

New products for 2017

*Discover the new series variants,
finishes and colours from Dallmer*

DALLMER

CeraWall Select

“Whether polished or anthracite, russet or brass coloured – our new shower channels set new trends in the world of bathrooms and spas in a number of ways”.

Yvonne Dallmer

CeraFloor Select

Variety and flexibility are the key words when it comes to the new Dallmer products for 2017. With that in mind, we have reworked the naming system for our product range in the interest of better orientation. A simpler, clear arrangement which will make it even easier for you to find the right Dallmer product.

These are the new products for 2017: the CeraFloor shower channels are also available in the “Pure” version. Developed for quality- and price-conscious customers. The addition of “Select” denotes the well-

known solid CeraFloor and CeraWall versions which combine exclusive materials and new colours to satisfy even the most discerning of tastes. The addition of “Individual” stands for the highest possible level of individuality in the world of bathrooms and spas. “Individual” provides shower channels and cover plates which fit in completely with the architecture.

Furthermore, we are also offering an even wider selection of finishes with a new range of PVD coatings.

CeraLine W

Shower channels for every structural situation

CeraFloor Select

Incredibly simple cleaning, exclusive design and an integrated cross slope for perfect drainage

- CeraFloor Select, the shower channel made of 6-mm-thick stainless steel with milled cross slope. Matt, polished or with a matt PVD coating, in the colours anthracite, russet or brass
- For the highest level of flexibility: CeraFloor Select comes in adjustable lengths and is available in 800 – 1500 mm. Lengths of 1600 mm and above are achieved using 50 mm increments*

CeraWall Select

CeraWall Select brings out the design of the bathroom

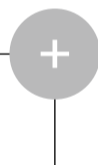

- CeraWall Select, the shower channel made of 5-mm-thick stainless steel with milled cross slope. Matt, polished or with a matt PVD coating, in the colours anthracite, russet or brass
- CeraWall Select comes in adjustable lengths and is available in 800 – 2000 mm*

CeraWall Individual

CeraWall Individual fits in perfectly

- CeraWall Individual is a concealed, built-in shower channel with integrated cross slope. Matt stainless steel or with a matt PVD coating, in the colours anthracite, russet or brass
- CeraWall Individual comes in adjustable lengths and is available in 800 – 2000 mm*

DallFlex – a drain body which always fits

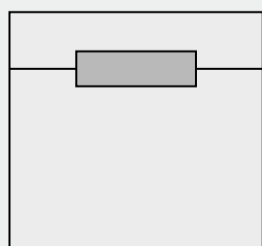

for installation with CeraFloor, CeraWall, Zentrix and CeraNiveau shower channels

also available as DallFlex shower underlay:

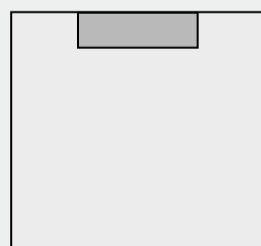

Shower underlay DallFlex Floor

suitable for CeraFloor shower channels

Shower underlay DallFlex Wall

suitable for CeraWall shower channels

Zentrix

Sophisticated technology – in an outstanding design

- Zentrix is a three-dimensional milled rectangular cover plate with an elongated drain opening, in stainless steel with a matt or polished finish or with a matt PVD coating, in the colours anthracite, russet or brass
- Dimensions: 300 × 50 mm

CeraNiveau

CeraNiveau raises the bar

- Solid rectangular short shower channel with circumferential drain opening, stainless steel with a matt or polished finish or with a matt PVD coating, in the colours anthracite, russet or brass
- Dimensions: 300 × 100 mm

CeraLine W

CeraLine F

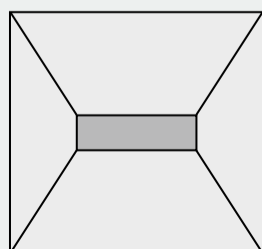

CeraLine stands for tried-and-tested quality

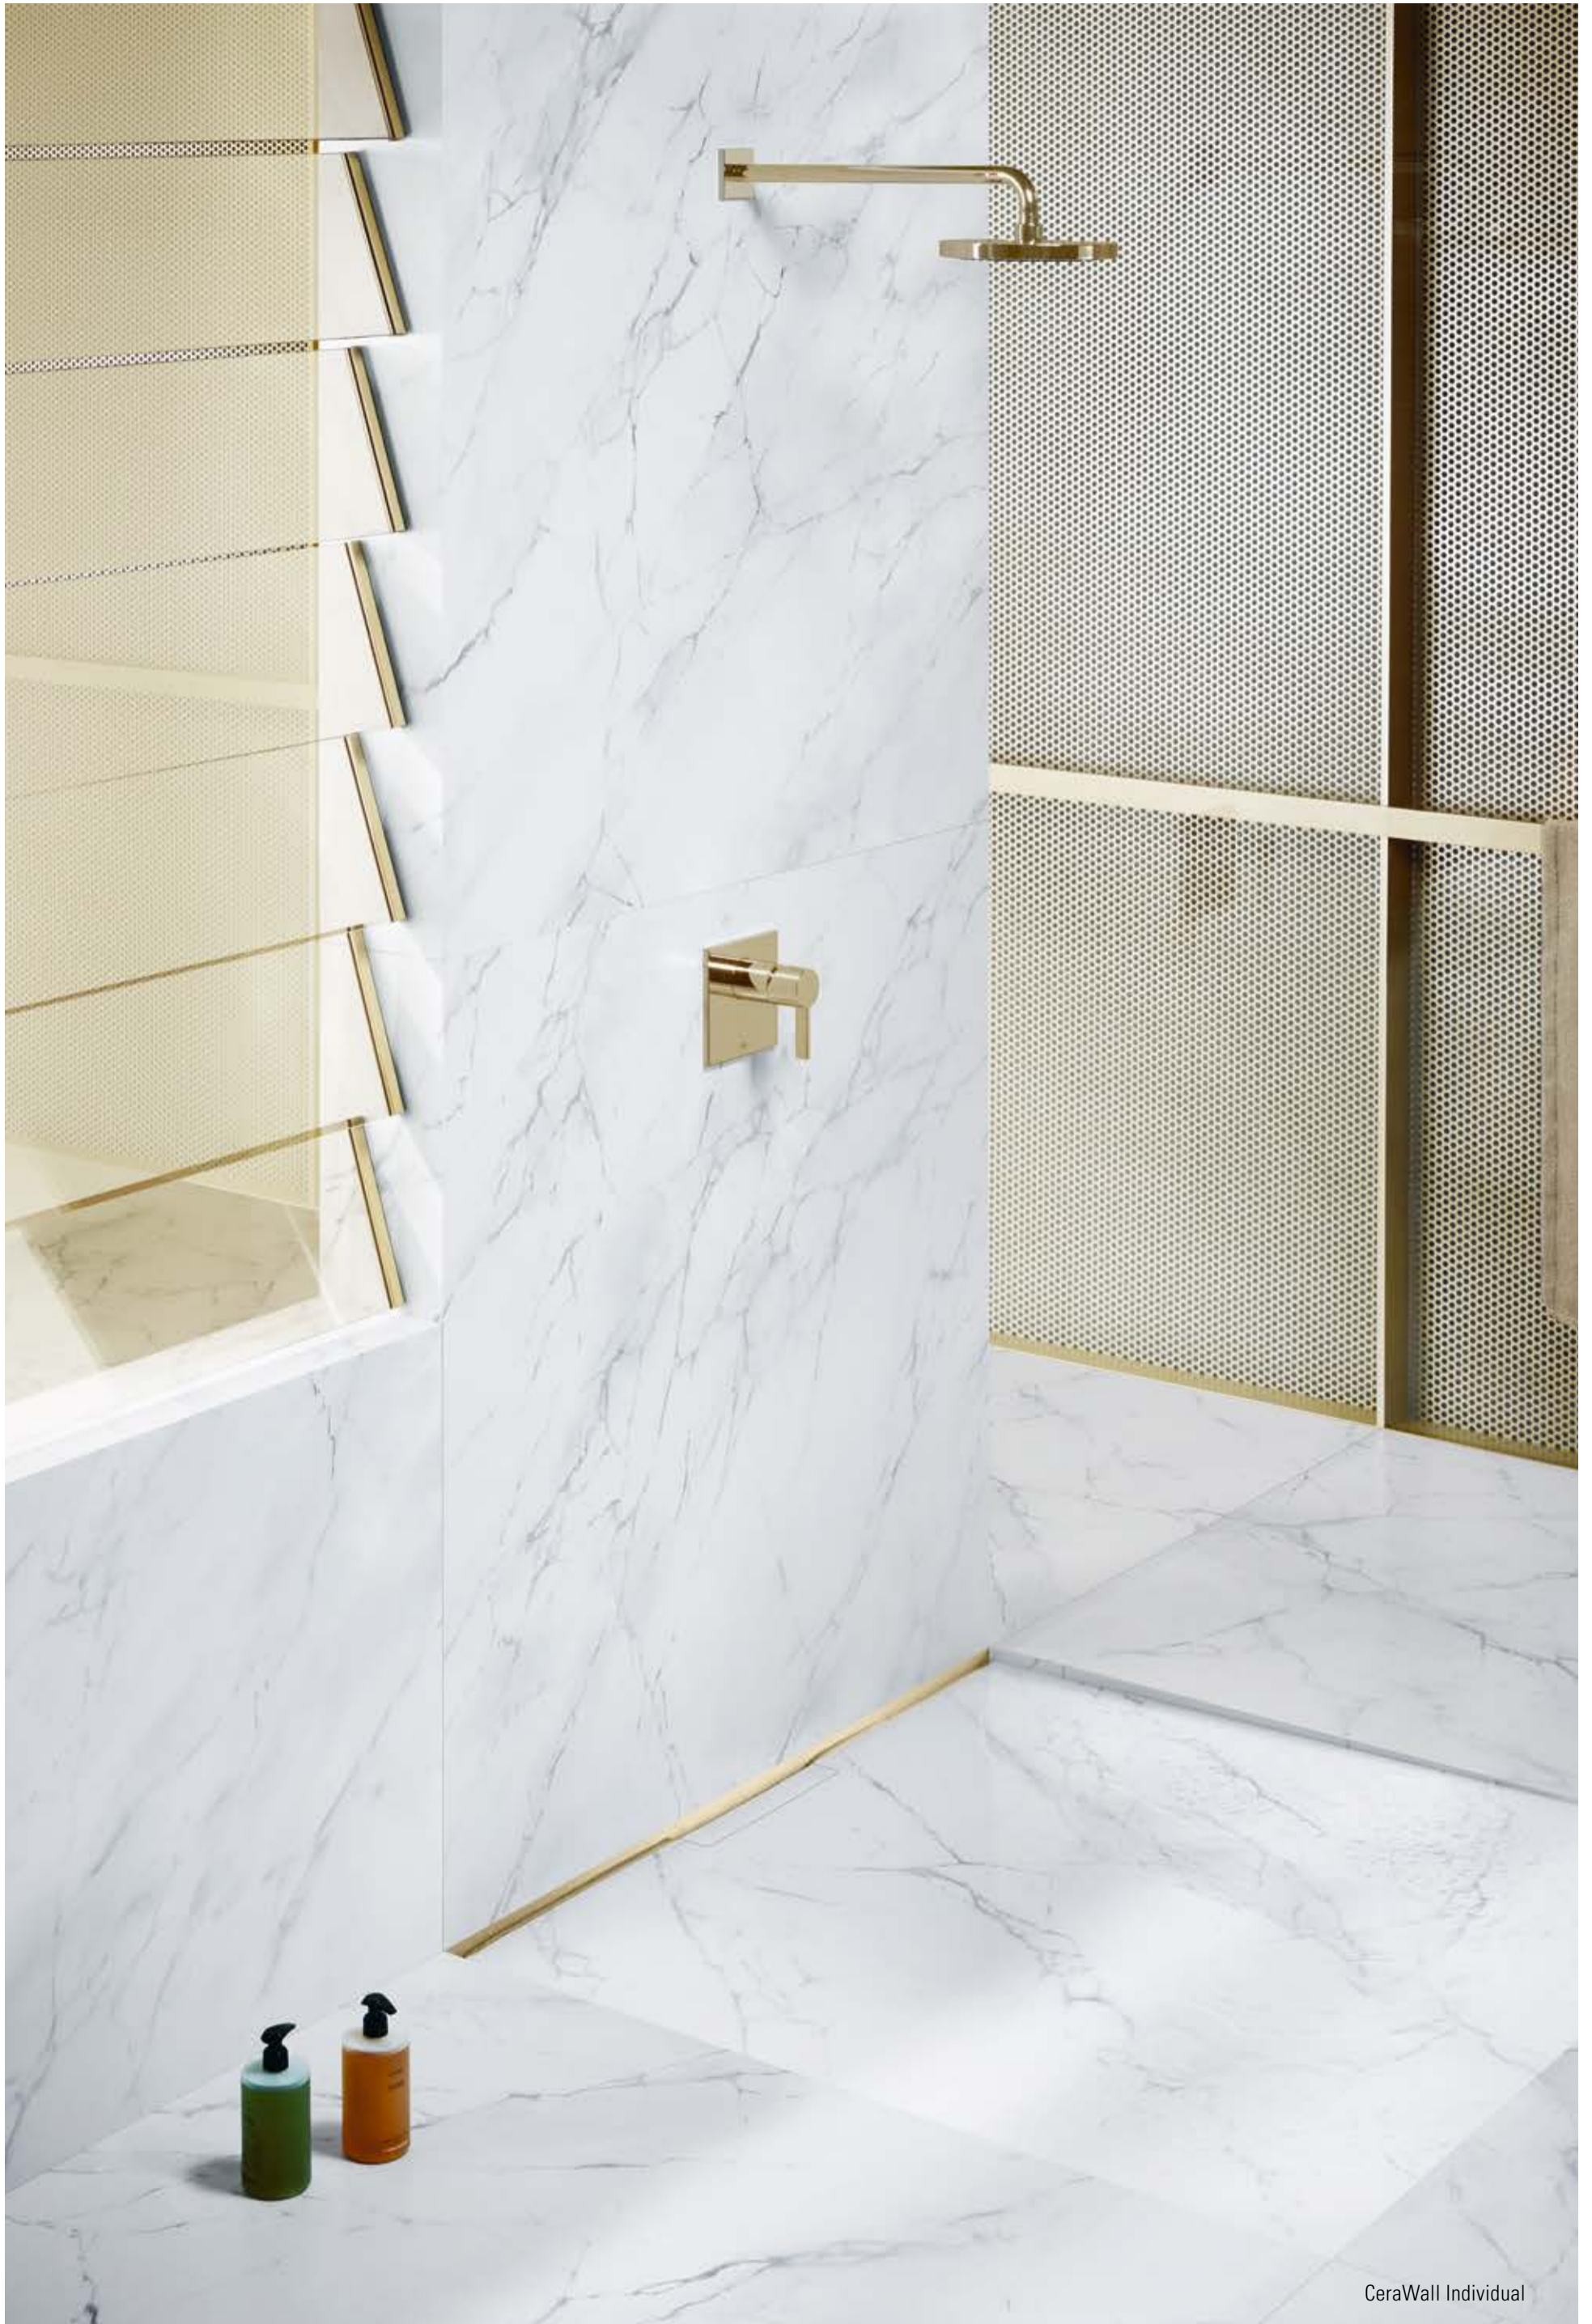

- CeraLine W as a solution for the wall or CeraLine F for the surface is elegant and intricate thanks to the cover plate's narrow width of just 40 mm
- The cover plates for CeraLine are available in stainless steel with a matt or polished finish or with a matt PVD coating, in the colours anthracite, russet or brass
- The CeraLine Individual cover plate can be tiled with individual floorings
- CeraLine W and F are available in lengths of 500 – 2000 mm *

Shower underlay DallFlex Compact

suitable for Zentrix and CeraNiveau shower channels

* colour versions up to 1200 mm

CeraWall Individual

Expands your range to include the most beautiful element – the new variety of material and colours

The Dallmer stainless steel shower channels with matt PVD coatings in anthracite, russet and brass

Anthracite

Brass

Russet

Using new colours to bring out the features

From minimalistic to glitzy: the new colours anthracite, russet and brass open up fascinating design opportunities for modern bathroom and spa architecture, which is defined more than ever by individuality. The story of the journey from ultra-thin PVC coating to the shower channel is a fascinating one: developed in reality as a functional protective layer for parts of sport motors which are subjected to heavy strain, nowadays the carbon-based surface finish is used with increasing frequency in interior design, e.g. for exclusive bathroom fittings. The combination of looks – brushed finishes maintain their structure, polished finishes keep their sheen – and durability makes the coating so attractive.

We think: this is particularly relevant for the high-end bathroom and spa sector.
