

# Detached house at PHOENIX Lake Dortmund

Product: Shower channel CeraFloor Select

Project: Detached house at PHOENIX Lake

Location: Dortmund, Germany

Architecture: Galert & Bielefeld Architekten

Year: 2015

A clear-cut design, great transparency and an unspoilt view of the lake – the perfect conditions for enjoying life near the shores of the PHOENIX Lake. The exclusive detached and semi-detached houses are part of an exciting urban development on an old industrial site. The living areas open out onto the garden and the lake, while indoors, bedroom and wellness areas merge seamlessly. Level-access showers offer convenience and excellent technology – and are aesthetically reduced to the essentials – with CeraFloor Select, the latest generation of shower channel. Thanks to the integrated cross-slope and the exclusive surface made of solid stainless steel, CeraFloor is truly „state of the art“, both in looks and technology.
