

Hotel Oversum, Winterberg

Product: TistoPlan floor drain

Project: Hotel Oversum
 Location: Vital Resort Winterberg, Germany
 Architect: Form A, Cologne
 Year: 2012

Hotel Oversum Vital Resort in Winterberg in the Sauerland region opened in 2012. It is situated in the middle of the extensive spa gardens, and is probably Europe's first ever 'egg hotel'. The Latin terms "ovum" and "universum" provided more than just a unique hotel name. The interplay of the architectural elements is unique, the atmosphere and wellness orientation universal. The surroundings offer diverse landscapes and nature escapes, as well as year-round sports facilities. In the hotel, guests can sample various 'living', 'spoil yourself', 'well-being', and 'pampering' worlds. Of course, such a 'one of a kind cosmopolitan hotel universe' can't do without a modern water world. Level-access showers with TistoPlan drains provide relaxation and carefree showering pleasure.
