

# Geschwister-Scholl School, Worms Support Centre

Product: Floor drain CeraDrain, grate Saturn 115

Project: Geschwister-Scholl School,  
Support Centre

Location: Worms, Germany

Architecture: P4\_Architekten BDA, Frankenthal

Year: 2016

The Geschwister-Scholl School is the headquarters of the three support schools that together form the Worms Support Centre. It is where pupils are taught with a focus on „learning“ and „holistic development“. In 2009, the school underwent a thorough renovation and from 2014 to 2016, the swimming pools and sports halls were extensively modernised. Thanks to the use of bright colours, modern materials and floor surfaces, the 1960s building appears almost new. As part of this modernisation, the changing rooms were fitted with CeraDrain floor drains and Saturn 115 designer gratings. The compact and flat design of these drains made them ideal for this purpose.
